REMARKS

Applicant filed a Sequence Listing and Preliminary Amendment, which were mailed on April 25, 2001. Applicant inadvertently overlooked amending the specification in accordance with 37 C.F.R. § 1.121(b).

As requested in the Notice of Non-compliant Amendment, Applicant has set forth above the amendment to the specification in clean form as required under 37 C.F.R. § 1.121(b)(i) and (ii). Applicant also attaches Appendix A with marked up amendments indicated with brackets and underlining as required under 37 C.F.R. § 1.121(b)(iii).

New pages 1 through 2 were submitted with the Preliminary Amendment mailed April 25, 2001, containing Sequences 1 through 3, formatted in accordance with the conventions set forth by PatentIn. No new matter was introduced by these new pages as they merely represent the sequences originally set forth in the application. The amendments to the specification were made to insert the sequence identification numbers. Accordingly, entry of these amendments and the previously submitted new pages is respectfully requested.
